About the College

Malla Reddy Institute of Technology and Science (MRITS) is an institution comfortable with the unique model of the technical education where the discovery, dissemination and application of knowledge are synergistically balanced. It is a part of larger societal systems and dynamically fuelled by the process of involvement – involvement in the needs of individuals; involvement in the nurturing of inquisitive minds; involvement in the transfer of ideas from the campus to the marketplace and beyond. The creation of new knowledge that will benefit future technological society is at the heart of our mission. In order to achieve a position of educational leadership, our institution fosters an atmosphere of intellectual excitement among faculty, staff and the greater student community.

Quality Policy

An effective source of technical manpower for the nation and to contribute to the growth of the nation by constantly upgrading the quality of technical education by meeting the challenging needs of the society and effectively coordinating the activities of the staff, students and the industry while keeping the ethical and moral standards required.

MALLA REDDY INSTITUTE OF TECHNOLOGY & SCIENCE

DEPARTMENT OF CSE(ARTIFICIAL INTELLIGENCE & MACHINE LEARNING)

Chairman Message:

I am happy to inform that the department of Computer Science and Engineering of MRITS is publishing their department newsletter for the academic year 2021-2022. I commend and appreciate the efforts taken by faculty and students to enhance the quality of academics in the college MRITS moreover the credentials and proven strengths to initiate much an indispensable academic activity.

Dr.C.H.Badhra Reddy

Message from Principal Desk

It is my pleasure in congratulating the department of CSE(AI&ML) on the pleasant occasion of releasing the newsletter for the period 2021-2022. It is great to find a considerable number of winners and participants in cocurricular and extracurricular activities which certainly prove that our staff and students are adequately equipped and posses necessary skill sets to bring such laurels to the institution.

Dr.K.Ravindra

Message from HOD:

I welcome all students and faculty who come up with such wonderful initiation. It has been interesting and busy year for the members of the department. The CSE(AI&ML)

CSE(AI&ML) News Letter

department has conducted a number of successful events including workshops, Guest Lectures, National Level Symposium and Conference. I invite all the readers to share this newsletter with your friends and contribute more in future.

Dr. N Vinaya Kumari

MISSION AND VISION OF THE DEPARTMENT

Mission

- To impart knowledge through the state-of-the-art concepts and technologies in AI and ML by adapting rigorous Teaching Learning process.
- To encourage students' all-round professional growth, by inculcating moral values and leadership abilities, so as to deal with societal issues.
- To educate the students in fundamental principles of computing and develop the skills needed to solve practical problems using contemporary computer-based technologies
- To provide necessary strengths and develop self-learning ability among the student to Improve innovative Thinking and become entrepreneurs.

Vision

To be in the frontiers of CSE (AI & ML) with academic excellence and research so as to produce technically competent and socially responsible engineers.

Programme Educational Objectives

CSE(AI&ML) News Letter

PEO1: Possess essential professional engineering skills that make them confident to develop high-quality AI solutions for various application domains under realistic constraints.

PEO2: Demonstrate the importance of life-long learning through professional development, computing practices, and specialized certifications.

PEO3: Engage and succeed in their professional careers through team work, ethical behavior, proactive involvement, and effective communication.

Programme Specific Outcomes:

PSO1: Design and development of software applications by using data mining techniques.

PSO2: Enrichment of graduates with global certifications to produce reliable software solutions.

Program Outcomes:

Engineering programmes offered by MRITS demonstrate that their students attain the following outcomes:

- 1. Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- 2. Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
- 3. Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- 4. Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

5. **Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6. **The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
7. **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
9. **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
10. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.
11. **Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12. **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.
